

Saflex® Solar interlayers are high-visible light transmittance, infrared (IR) radiation-absorbing interlayers designed to enhance solar heat gain performance in laminated glass compared to

monolithic clear glass and laminates made with conventional polyvinyl butyral (PVB) interlayer. They have the capability to meet or exceed many regulations for laminated safety glazing

when properly selected, laminated, and installed.

The ideal solar product eliminates UV and NIR energy while allowing as much visible light transmittance as possible. As shown in the adjacent chart, Saflex Solar has the transmittance of a highly effective high-visible light transmittance solar product. Plus, Saflex Solar is specifically formulated to provide exceptional durability when exposed to natural weathering.

Saflex Solar is the PVB formulation of choice for applications where strengthened glass is specified to provide additional load or stress resistance (e.g., point-fixed system). Two options are available in the Saflex Solar range: Saflex Solar SG is our highest-performing Solar PVB interlayer, Saflex Solar SH has a more color-neutral appearance and may be laminated with annealed glass in some applications.

Saflex Solar is compatible with other Saflex interlayers such as Saflex Clear and Saflex Structural, as well as Vanceva® color Interlayer systems. In specific configurations, Saflex can be advantageously combined with low-e coatings or robust solar control coatings.

Contact your Eastman technical representative for further information on these advanced usage opportunities.

Applications

- Curved glass applications
- Low-reflection glazing
- Premium retail showrooms
- External glazed façades (especially in hot regions)
- Digital signage

Saflex® Solar product offering

Product nomenclature	Thickness, mm	Std. widths, cm	Std. lengths, m	Color	Form	
SH41/SG41	0.76	100, 120, 140, 160, 180, 200, 225, 244, 322	250	Class	Refrigerated	
		100, 120, 140, 160, 180, 200, 225, 244, 280 cm	247	Clear	Interleaved	

Saflex® Solar technical data

	Technical properties	Test method	Units	SG	SH
Solar	Solar transmittance		%	37	51
	Solar reflectance		%	6	5
	Solar absorptance	ISO 9050, NFRC 100;	%	58	43
	Solar heat gain coefficient (SHGC)	LBNL WINDOW	_	0.55	0.65
	Shading coefficient		_	0.63	0.74
Thermal	Light to solar gain (LSG)		_	1.40	1.40
			W/m²·K	5.67	5.67
	U factor		BTU/h·ft²·°F	1.00	1.00
UV	Transmitted UV		%	<0.01	<0.01
O V	Damage weighted factor (Tdw)		_	0.21	0.22
Solar and optical	Visible light transmittance		%	76	83
	Visible light reflectance		%	8	7

Architects and designers trust Saflex®

Around the world, architects and designers trust Saflex when performance and safety are their most critical concerns. The reason for their confidence is simple. No matter what the specifications or performance targets, Saflex interlayer technology delivers advanced glazing performance for demanding applications.
